LPM

Nata in Toscana nei primi anni 70, la LPM ha saputo creare negli anni linee prestigiose che si sono in breve tempo diffuse con successo sul mercato e sono state spesso punto di riferimento del mondo della cornice.

Se agli esordi l'interesse principale era rivolto all'arte contemporanea, la LPM ha diversificato nel tempo e soprattutto negli ultimi anni la propria produzione adeguandosi alle richieste del mercato ed ampliando la sua gamma con preziose collezioni artigianali, arrivando cosi ad offrire alla sua clientela una vasta gamma di prodotti, dal moderno al tradizionale, con una collezione di oltre 700 articoli di campionario standard e circa 500 articoli speciali.

La nostra collezione è costantemente aggiornata con l'introduzione di nuove linee studiate per rispondere alle esigenze attuali del mercato e, grazie alla costante ricerca di tecniche innovative, il nostro principale obiettivo è quello di poter offrire sempre cornici uniche.
Tutti i profili riprodotti sul catalogo sono a grandezza reale in modo tale da offrire al corniciaio un facile strumento per trovare la cornice più adatta alle esigenze del cliente.

Established in Tuscany in the early 70's. LPM has been creating prestigious lines during the years, which have rapidly and successfully spread on the market, often representing a landmark in the world of frames.

Born as a company mainly dealing with contemporary art, LPM has been diversifying its production, especially in recent years, constantly adjusting it to the demand arising from the market and widening its range with prestigious artisan collections. As a result, customers have been supplied with a wide range of products, from modern to traditional ones, with a collection counting over 700 standard range items and approximately 500 special items.

Our range is regularly updated by adding new lines expressly studied to meet the current demands of the market since our main aim is, by steady search for innovation, to always create unique mouldings, pieces of art. All profiles are reproduced in their real sizes so that framers can easily find the most suitable style for their customers' requirements.
